

# Super Universal Circular Chart Recorders

Omega's new series of microprocessor based portable universal circular chart Supere recorders™ come in 4 different models:

- Temperature and relative humidity (comes with a Windows-based PC software application and an optional wireless temperature and relative humidity probe).
- Dual thermocouple.
- Dual process.
- pH and (RTD) temperature.

Included with the Supercorders are:

- A keypad for programming.
- Large, bright, dual backlit display.
- RS232 PC interface, allowing users to download recorded data.
