

Bulk Bag Filler With Programmable Controller

Spiroflow Systems, Inc. has redesigned its C1-2 Bulk Bag Filler to include a programmable controller that can increase filling accuracy and cycle speed. Features of the filler include:

- Automatic gain in weight adjustment to monitor and compensate for any weight variation.
- Programmable one-touch controls for the filler and upstream in-feed devices.
- Accuracy within 1 percent.
- Filling rate of up to 20 bags an hour.
- Optional power height adjustment, retracting bag hooks, filling nozzle and inflatable mechanical seal, liner inflation device, roller bed, and electric or pneumatic vibrators.
