

AODD Pumps with Quiet Air Control System

Almatec has released its new E-Series Plastic Air-Operated Double Diaphragm (AODD) Pumps. Features of the pumps include:

- PERSWING P[®] air-control system and valves, which is a metal-free, pneumatically pilot-operated system that ensures accurate reversal of the main piston and is characterized by low noise levels.
- Ball valves constructed from EPDM, PTFE, NBR and stainless steel, depending on the pump's application.
- Optional cylinder valves made of PTFE.
- Strong priming capabilities and consistent, accurate flow.
