

High Capacity Vibratory Screener

The Vibroscreen[®] vibratory screener from Kason Corporation discharges oversize particles 360° around the periphery of a circular screening deck in order to increase capacity, improve efficiency, minimize screen blinding and prolong screen life. Features of the screener include:

- 60 in. (1524 mm) diameter.
- External Cascade deck.
- Optional clean-in-place spray heads, anti-blinding devices, articulated lids for rapid screen changes, and an automatic long-term lubrication system for gyratory motor bearings.
- Available with any of Kason's vibroscreen separators ranging from 40 to 72 in. (1016 to 1829 mm) in diameter, or as a retrofit kit for any make of circular vibratory screener.
