

Programmable Timer Ball Valve

A new programmable automatic timer for compressed air supply from Keller Products Inc. allows prescheduled untended operation of any air-driven piece of equipment. The timer:

- Will open and close a compressed air line for a selected duration on a programmable schedule.
- Features easy to program quartz controlled timer with multiple cycles possible in each day.
- Is supplied with a 115-V cord and plug, and a 1 inch NPT ball valve for the compressed air.
