

Dynamic Weighing & Contaminant Detection

The XS3 AdvanChek X-ray CombiWeigher from Mettler-Toledo Hi-Speed combines checkweighing and x-ray inspection technologies in one space-saving system. Features of the system include:

- Over and underweight checkweighing.
- Simultaneous inspection of products for physical contaminants such as glass, metal, stone, bone and high density plastics.
- EMFR weigh cell technology for accurate dynamic weighing which fulfills all local weights and measures regulations (MID certified).
- IRR 1999 compliant.
- HACCP-compliant stainless steel (V2A) design and sealing up to IP65.
- 15" color touch screen interface.
- Compact footprint.
