

Portable & Energy Efficient Pump System

The AutoJet® FDS30100 fluid delivery system from Spraying Systems Co. is a portable, energy efficient pump system that optimizes the performance of a wide range of tank cleaning and spray nozzles. The system:

- Reduces chemical, water and energy use.
- Uses a variable frequency drive to eliminate the need for control valves to throttle flow.
- Can use a wide range of nozzles including spray balls, tank cleaning nozzles and general purpose full cone, flat spray, hollow cone and fogging nozzles.
- Is rated at 30 gpm at 100 psi (114 l/min at 6.9 bar).
