

Sanitary Bench Scales

Hardy Instruments' new Enviro™ bench scales withstand high-pressure, high-temperature washdown environments. The scales:

- Work with any Hardy Instruments weight controller/indicator to transfer data directly to PLCs, DCSs and PCs.
- Expose all surfaces for easy cleaning and sanitizing.
- Use closed corners on the platform cover to prevent splash collection of water or processing materials inside the scale.
- Use bushing and spacers to eliminate lap joints and facilitate quick and easy cleaning.
- Have capacities range from 2 to 100lbs, and platform sizes of 10"x10", 12"x12" and 18"x18".
