

# Improve Operational Performance

Life Cycle Engineering's Reliability Consulting Group, a solutions provider for consulting, services and education, is introducing targeted services focused on helping businesses rapidly improve operational performance. These services are provided by experienced subject matter experts and combine specific equipment and process improvements with education, training and mentoring that will improve labor productivity and reduce unplanned downtime.

[Reliability services](#) [1] include:

- Planning and scheduling best practices assessment and coaching.
- Root cause failure analysis.
- Loss elimination.

[Asset management services](#) [1] include:

- Preventive maintenance optimization.
- Equipment maintenance plans and job plans.
- EAM implementation and optimization.

[Change management services](#) [1] include:

- Change planning workshop.
