

Integrated Custom Air Handler

According to Munters Corp., its Integrated Custom Air Handler (ICA) dehumidification system has simplified the complex task of integrating a desiccant dehumidifier with other air conditioning components. Other benefits of the system include:

- Customization into multiple configurations.
- 10 rotor sizes and 7 desiccant options from which to choose.
- Double wall construction with a no-through metal design in either 2.5- or 4-inch wall thicknesses.
- Surface options of galvalume, textured aluminum, stainless steel or any combination, which allows for an effective choice for all operational environments.
- A range of standard components engineered for optimal performance.
