

Vertical Laminar Flow Cabinets

The Purair vertical laminar flow cabinets

feature:

- Airflow that directly strikes the work surface.
- Rear wall perforations which remove a small amount of air at the rear of the cabinet to minimize any turbulence.
- ULPA filter mounted above the work surface, providing a larger work space.
- Sizes of 36", 48" and 72" (width).
- Nominal filter face velocity of 0-45 m/s (90 fpm).
