

Wireless Meter Scanner & Controller

Omega's new wi-8 series of wireless monitoring and control systems are highly compatible with a wide range of Omega wireless sensors including the UWTC, UWRTD, and z series. Compact in size and simple to configure, the wi-8 features:

- The ability to monitor up to 8 wireless sensors.
- Thermocouple, RTD, temperature, humidity, and barometric pressure wireless inputs.
- A choice of either two Form C relays or two SSR's (solid state relays) that can be used for control functions or alarms.
- Monitoring via local or embedded Ethernet or Internet connection without any additional software other than a web browser.
