

On Guard Against Hazardous Openings

Wildeck recently launched 2 rugged Laddergard™ safety swing gates that protect personnel at potentially dangerous openings, including: loading dock ladders, mezzanine or work platform ladders, rooftop access ladders, maintenance access ladders, stairway openings, equipment and machinery platform ladders and stairs, in addition to other applications. Features include:

- A self-closing profile.
- Structural steel construction to withstand daily use and abuse.
- A durable 2-part polyurethane coating in a bright safety yellow color for high visibility, even in low-light conditions.
- 2 sizes that can adjust to fit either 16- to 26-inch (W) openings or 27- to 40-inch (W) openings.
- Easy installation to existing pipe rails up to 2 inches (dia.).
- Compliance with OSHA 1910.23 safety requirements.
