

Explosion-Proof Electric Fans

CS Unitec offers a line of intrinsically safe, electric-powered explosion-proof axial fans for ventilating, exhausting and cooling. According to the company, the electric fans:

- Are ATEX certified Ex II 2 GcT3 to be explosion proof, safe for use in Ex Zones and environments where explosion hazards are present.
- Can eliminate time and manpower lost in obtaining "hot zone work permits" required for other blowers and ventilators.
- Are 12" in diameter and have an output of 2118 cfm.
- Weigh 45 lbs.
- Use a standard protective grille on the intake side.
