

Halogen-Free Flame Retardant Power Cords

The EcoPower from Northwire Technical Cable is the industry's first halogen-free flame retardant (HFFR) power cord that is UL 62 approved. EcoPower is flexible, durable and guaranteed to perform in harsh environments. Other features include:

- Custom designs with no minimum order length or quantity requirements.
- Operating temperature range of -50°C to 105°C.
- Custom colors and retractile cord configurations.
