

Loop-Powered Particulate Transmitter for Dust Collectors

The FilterSense loop-powered particulate transmitter and filter leak/emissions detector for baghouses, cartridge dust collectors and cyclones features:

- Simple 2-wire installation and single piece mounting.
- Heavy process duty construction, advanced induction sensing and a protected probe.
- EPA compliance.
- The ability to detecting emissions before they are visible, prevent the escape of valuable powders and protecting downstream equipment such as blowers and HEPA filters.
