## **Long-Distance Industrial Wireless Transmitter**

**OMEGA** Engineering introduces its

UWXL industrial wireless transmitters with flexibility for process measurement applications. These transmitters offer:

- Suitability for a variety of applications, including temperature, infrared temperature, relative humidity, flow (pulsed frequency), pH and process transducers with standard voltage or current outputs.
- Availability of thermocouple, RTD, infrared temperature, relative humidity, pH, process voltage/current and flow/pulsed frequency input models.
- An IP68-rated industrial enclosure.
- Free software that converts your PC into a multi-channel chart recorder or data logger.
- Compatibility with both of the company's UWTC-REC and UWXL-REC wireless receivers.
