

Energy Management & Your Bottom Line

Schneider Electric's EcoStruxure active energy management architecture can deliver up to 30 percent energy savings by uniting energy-intensive systems like HVAC, access control, video security management and lighting control. The company's free brochure is available online and outlines, amongst other things, how building management systems:

- Affect your product pipeline.
- Can accelerate return on investment (ROI).
- Fit in with regulatory requirements.
- Find efficiencies in controlling and monitoring critical systems, and capturing key data.
- Utilize total environment management (TEM).
- Lower cost and risk.
- Improve security.
