

Portable RFID Reader with Database Support

Tharo Systems Inc. has released the UHF Generation 2 RFID reader, designed for ease of use, comfort and mobility. It features:

- LCD display.
- Long battery life.
- Capability to save up to 4,000 RFID scans in its internal memory.
- Free software that will allow you to save RFID data in an Access compatible MDB database, create and search custom reports, as well as export CSV files for easy system integration.
