

Cloud-Based Collaboration Tools

Synergy 3000 SPC Connectivity for the Cloud

Zontec's Synergy 3000™ Statistical Process Control (SPC) System is designed to gather, organize, analyze and report on the huge data sets required for real-time quality management over the Internet from highly dispersed global locations. It serves as a comprehensive suite of quality collaboration tools that enable authorized users anywhere in the world to:

- Input measurements or inspection counts.
- Monitor process status.
- Troubleshoot processes by reacting to adverse events.
- Track and trace production samples.
- Exchange quality assurance data with customers and supply chain partners.
- Make sound product quality decisions within a secure computing environment.
