3-A-Approved Sanitary Probes

OMEGA® PRS-TMM12 Series

transducers are not only 3-A-approved, but also designed for use in sanitary or hygienic clean-in-place applications. These transducers are further highlighted by:

- 316L stainless steel housings that meet the dimensional and finish requirements of 3-A 74-03 and ASME BPE-2007.
- A profile that's welded and processed to provide a clean, smooth, 32-micro-inch or better surface finish in the wetted areas for clean-in-place processes.
- An integral transmitter and M12 connector.
- Suitability for the food, dairy, beverage and biopharmaceutical industries.
