

## View Temperature & Humidity via the Web

The OMEGA® iTHX-SD transmitter lets you monitor and record temperature, relative humidity and dew point over an Ethernet network or the Internet without special software — except a Web browser, of course. It serves active web pages to:

- Display real-time readings.
- Depict charts of temperature and humidity.
- Log data in standard data formats for use in a spreadsheet or data acquisition program, such as Excel or Visual Basic.
