

## Minimize Sample Loss & Eliminate Errors

Mettler-Toledo recently added ErgoClips, which allows you to dose directly into the tare container, to its line of green solutions for the laboratory. ErgoClips also provide:

- The power to help eliminate transfer errors and save money by minimizing sample loss.
- A safer dosing method that substantially reduces contamination risks, enables fast dosing processes and increases productivity.
- Availability in numerous configurations to secure dozens of types of tare containers for use with XP and XS analytical and XP micro balances.
