

Compliance Management Tool Transcends Enterprise

RISC Associates

Compliance automation tools developer RISC Associates has announced the Enterprise Program Manager (EPM), a dashboard-driven compliance and program management tool that transcends departmental silos and provides visibility into all assessments, audits, reviews, and tests throughout the enterprise so that users know whether if they are on target to meet regulatory, corporate, and departmental goals. EPM features:

- An actionable solution that allows users to conduct and manage audits, assessments, reviews and tests, identify risks, manage remediation, comply with regulations and easily report on it all.
- The ability to conduct a test once and utilize the same evidence, observations, findings, recommendations, and results many times within other audits and assessments.
- No need for multiple regulation-specific tools (e.g. SOX, PCI, etc.) since EPM accommodates all known requirements.
- A variety of pre-populated and fully editable audits, assessments, reviews, and tests for pharmaceutical, utilities, energy, and manufacturing.
- Charts, pre-formatted reports, and Ad Hoc reporting.
- The ability to import existing programs.
