

Gentle Sifting Machine

Great Western

Manufacturing's GyroSift GS36 provides gentle gyratory sifting motion and is designed for applications requiring smaller screen areas. It is available with one to three 36-inch diameter stainless steel sieves and comes equipped with various features including:

- V-belt drive and counterweight assembly which ensure that the sifter speed and circle are matched to provide optimum separation performance for everything from flakes to fine powders.
- Trays which use mechanically stretched screens to provide optimum screen tension and sanitation; it can be furnished with the support frame for floor mounting or suspended from the structure.
- Upmost sanitary design by providing stainless steel product contact areas and snap-on neoprene gaskets.
- Simple design and ease of access which make the sifter low-maintenance and simple to clean.
