

BEST Vibrators & Drives for Endless Applications

Metso Minerals Industries manufactures a full line of BEST heavy-duty air-powered piston and rotary-electric vibrators and drives designed for bins, hoppers, chutes, screeners, vibratory feeders, conveyors, tables and other vibratory applications. These vibrators and drives additionally provide:

- Continuous maximum-force operation — from 30 to more than 40,000 pounds.
- Dust-tight, splash-proof motors for optimal field performance in harsh environments, including dirt, rain and snow.
- Heavy-duty construction (that includes ductile-iron castings, steel end covers and high-alloy fasteners) to ensure long life.
- Availability of motors in 3,600-, 1,200- and 900-RPM models, from 1/50 to 17-1/2 HP. The flexibility to mount units either horizontally or vertically.
