

20,000- & 15,000-PSI Self-Rotating Nozzles

NLB Corp. introduces 2 new Typhoon™ 10 Series self-rotating tube-cleaning nozzles for tubes with diameters of at least 0.75 inches. The nozzles are further highlighted by:

- A maximum operating pressure of 20,000 PSI (RPN 2020) and up to 15,000 PSI (RPN 1520).
- The power to rotate at 7,000 RPMs
- A maximum flow of 20 GPM.
- The latest NLB seal design, which reduces leakage by 50 percent.
- A pressure range from 15,000 to 24,000 PSI and flow range from 9 to 60 GPM.
- 7 self-rotating nozzles from which to choose, for tube diameters from 0.625 to 50 inches.
