

Next-Generation Pump, Motor Mounting

Iwaki America has partnered with BaseTek to provide the next generation of pump/motor mounting. According to both companies, BaseTek's unique Zanite polymer-composite corrosion-resistant material, coupled with Iwaki America's Teflon-lined seal-less pumps, make the best combination for chemical processing applications. BaseTek's patented Polyslot® design also allows many pump configurations to mount to a single base, therefore reducing inventory and easing installation.
