

NSF-Certified Crosslink Tanks

Assmann Corp. has announced that its crosslink chemical storage tanks are now NSF 61 certified for chemical storage and are suitable for various chemicals. The high-density crosslink resin tanks are additionally highlighted by:

- Your selection from vertical storage, horizontal storage, double-wall, conical-bottom or open-top tanks, as well as chemical feed stations and secondary containment basins.
- Capacities from 40 to 12,000 gallons.
- Polyethylene construction in a variety of shapes.
- Availability of secondary processing, such as fittings, vents, fill lines, heat tracing and insulation.
