

# Wireless Temperature Loggers

T&D Corp. introduces its RTR-505Pt wireless temperature logger as compatible with industry-standard 3-wire PT-100 sensors and accepting of industry-standard 3-wire screw terminal attachments. The logger also grants:

- A large, IP64 water-resistant LCD display that holds 16,000 readings.
- Operational temperatures from -199° up to 650°C, depending on the sensor selected.
- A communication range of up to 500 feet, with the flexibility to be extended with the use of repeaters.
- A battery life of up to 10 months (or 4 years with the L model).
- Compatibility with all of the company's RTR-500 Series wireless data collectors.
