

Console Yourself with a Desk Console

OMEGA Engineering introduces its SCE-DC Series operator desk consoles as intended for indoor use to house electronic and electrical instruments and controls. Features include:

- The ability to protect electrical components against solid foreign objects, dirt and water. The flexibility to be used in a standing or sitting position, and allow for installation of an operator interface, control pushbuttons and selector switches.
- 1- or 2-door access in both the front, or front and rear of the enclosure.
- Hardware so the desk can be propped open for easy access.
- Sub-panels available for mounting electrical components.
- Ideal suitability for use in the chemical and packaging industries.
- A NEMA 4/12 rating.
- Optional key lock latches for additional security.
