

High-Speed Checkweighers

Mettler-Toledo Safeline has built the Hi-Speed Corner-stone® SA™ checkweigher for applications that require heavy washdowns. Furthermore, the company says that the system boasts:

- Corrosion-resistant, non-toxic and non-absorbent product contact areas.
- Non-product areas designed to eliminate debris buildup and potential bacterial reservoirs.
- A weighing accuracy for up to 13 pounds of product.
- Easy-clean snap-out conveyors and quick-disconnect servo motors.
- Full stainless steel construction that can withstand harsh environments, such as those where blocks of cheese, ice cream bars, milk, and raw and processed meat products are produced.
- A hygienic design.
- A fully customizable profile for integration into existing production lines.
