

## Long-Range Industrial RFID

Balluff's BIS U series UHF, or Ultra High Frequency RFID (Radio Frequency Identification), provides one of the most reliable and flexible tools to get visibility into your supply chain and manufacturing process. The system:

- Enables real-time visibility for logistics and manufacturing.
- Unlike bar codes, UHF does not require "line-of-sight."
- Requires no batteries for long-range transmission.
- Features an operating range of up to 6 meters.
- Includes an RS232 Serial or Ethernet TCP/IP interface option
- Can detect and process multiple RFID tags at once
- Is suitable for asset tracking, logistics tracking, closed loop and supply chain logistics, and production tracking.
