

Nothing Gets Past this Lil' Piggy

New Pig Corp. specifically designed its PIG® LEAKTRAPPER™ universal absorbent pillow to capture and absorb nuisance leaks at their source, before they hit the floor and become a hazard. The company says that the LEAKTRAPPER™ pillow is further highlighted by:

- The power to both catch and retain high-volume leaks and persistent drips.
- The ability to absorb up to 33 ounces per pillow.
- Cellulose filler to absorb oils, coolants, solvents and water.
- A loop-backed bottom that attaches securely to heavy-duty Velcro® hooks.
- The flexibility to be easily positioned and repositioned around hose connections or virtually anything that leaks.
- A puncture-resistant, impermeable poly backing to prevent strike-through onto surfaces.
- Availability in several sizes, as well as an optional oil-only version.
