

Out-of-the-Box Enclosures

Integra Enclosures recently launched its Genesis enclosure to meet customer needs for a large-scaled protection solution. According to the company, this non-metallic enclosure additionally offers:

- Construction from high-impact, UV-resistant polycarbonate materials.
- 16 standard configurations, including hinged or non-hinged lids.
- Dimensions of 24 by 24 by 10 inches.
- The company's patented adjustable swing-panel mounting system for flexible interior mounting.
- Easy installation of devices and DIN rails due to multiple bosses on the product.
- A NEMA 4X and UL rating.
