

# Promoting Bulk Bag Product Discharge

Material Transfer & Storage has custom designed its MATERIAL MASTER™ half-frame bulk bag-discharging system with an exclusive heavy-duty Flo-Master™ breaker bar bulk bag-massaging system to promote product discharge. According to the company, the MATERIAL MASTER also boasts:

- A Flo-Lock™ actuated discharge spout closure system to quickly halt material flow for partial bag discharge, allowing the bag to be retied and removed.
- A fully integrated, dual-rotor delumper.
- 304 stainless steel product contact surfaces.
- Custom designs for your specific application requirements.
