

Small-Character Thermal Ink Jet

Videojet Technologies introduces its Wolke m600® advanced small-character thermal ink jet printer to enable high-speed coding of serialized data and many types of bar codes, including GS1 DataMatrix, to be compatible with track-and-trace applications. Other features include:

- 4 printhead models that facilitate integration into packaging lines by enabling printing from above or laterally.
- Print heights ranging from 1/2 to 2 inches.
- Quick ink-cartridge replacement.
- Wolke universal black ink, a genuine Hewlett-Packard® ink.
- Availability of software packages to increase functionality and productivity.
