

Catch Cloths Contribute to Cleanliness

American Fabric Filter now offers 18-gauge vinyl catch cloths for installation under conveyors in the food-processing and baking industries. Moreover, these catch cloths boast:

- The prevention of errant product from dropping onto other lines or being transferred throughout the plant.
- The ability to ease plant cleanup by confining spillage in an area.
- The flexibility to duplicate straight profiles, 45° and 90° turns, and S-curves, as well as add dump chutes or funnels for high-volume applications.
- Custom sizing and grommet placement to fit beneath any conveyor.
