

Protection for Your Entire Arm

PolyConversions introduces its VR™ sleeve glove that is made from a unique combination of 8-mil nitrile gloves and the company's lightweight 4-mil VR protective sleeves. The company says that these sleeve gloves further provide.

- Durable hand and arm protection.
- Multi-use impervious splash protection against liquids, body fluids, and chemicals and acids.
- Protection against chemical and biological contaminants.
- Comfortable flexibility, along with high-tactile sensitivity.
- A design that is tough enough for reuse.
- An upper arm elastic cuff to ensure that the sleeve portion does not slip down the arm.
- Odorless and nontoxic personal protection equipment.
- Freedom from vinyl and latex.
