

Simply Shaking Odd-Shaped Vessels

LabStrong has developed the EZ-Strap platform assembly as an accessory to attach to its Helix™ orbital shaker for applications that are not well-served by traditional clamping systems or methods. The EZ-Strap also grants:

- The flexibility to accept a variety of vessel sizes and shapes.
- Accommodations for test tubes, conical tubes, and even small beakers and flasks.
- Several anchor points that allow for multiple vessel configurations.
- The capability to easily secure the flexible EZ-Straps to the anchors for quick setup and reconfiguration.
- Quick and easy attachment to the Helix 250 shaker.
- The inclusion of 4 EZ-Straps, 1 EZ-Strap platform and 1 non-slip mat.
