

## Chemical Bulk Tanks

Ross Engineering now accepts a wide range of custom fabrication projects, including chemical bulk tanks as large as 100,000 gallons. The company says that it manufactures storage tanks, pressure vessels and reactors for a variety of applications. Commonly supplied features include:

- Vacuum and/or high internal pressure.
- Agitators and controls.
- Heating/cooling jacket or coils.
- Heat tracing.
- Sheathing and insulation.
- Vents and overflow pipes.
- Polished sanitary designs.
- Special coatings and tank liners.
- Compliance with ASME, USFDA, BISSC, ABS, API650, API620 and U142.
