

Efficient Mud Mixers

Chemineer® Mud Mixers for Drilling Mud Applications

Chemineer® mixers offer performance, efficiency and reliability in mud mixer applications. According to the company, the mixers additionally feature:

- High-efficiency gearboxes designed specifically for agitator service.
- Proprietary analysis software is available to evaluate process parameters and ensure proper impeller selection for specific drilling mud mixing conditions.
- Proven performance in mixing larger and deeper mud tanks for cost-effective operation.
- Rugged gear drives that withstand harsh environments typically encountered in mud mixing applications for reduced maintenance costs and long service life.
- Highly efficient impeller technology that reduces horsepower requirements and blade erosion over canted impellers and submersible mixers.
- Uniform suspension of solids for optimal drilling mud consistency.
- Upgrades for underperforming agitators.
