Don't Knock this Impactor

EXEN Corp. introduces its KNOCKER/IMPACTOR as 100 percent pneumatically operated and capable of solving any kinds of problems, such as bridging, rat holing, arching and adhering to hoppers/bins. According to the company, this flow-aid device can additionally solve problems when vibrators cannot, such as handling fine and sticky powder in the toner, ceramics, minerals, food and chemical industries.

PTXi Booth #3525, #3527
