

There's a Draeger Gas Detection App for That!

The Draeger logo is displayed in a large, blue, sans-serif font.

Draeger Safety introduces its new Draeger gas detection app for Apple mobile devices, including the iPad, iPhone and iPod touch. The company says that this application provides:

- A general overview of gas and vapor measurement technology.
- The basic principles of the company's tubes and chip measurement systems, portable gas monitors and sensors, including the relevant measurement parameters.
- Convenient and immediate access to current information on all of the company's portable gas detection products within a lightweight, portable device.
- An introduction to portable monitors, including electrochemical, catalytic and infrared sensor technology.
- An easy-to-use application with an intuitive interface and searchable content.
- The capability to improve safety and efficiency in environments where it is necessary to monitor for toxic gases.
