

Combustion Gas & Emissions Analyzers

E Instruments has designed the E4400 flue gas analyzer to monitor emissions, as well as maintain and tune combustion processes. According to the company, this portable analyzer also provides:

- True NO_x capability and low NO_x.
- Up to 4 field-replaceable and pre-calibrated gas sensors, including O₂, CO, NO, NO₂, SO₂ and C_xH_y.
- Temperature and pressure measurements.
- A dilution pump for CO auto-range measurements up to 50,000 PPM.
- An internal data memory that can store 900 tests.
- Unbreakable metal hose connectors.
- A rechargeable lithium-ion battery pack.
- A software package with both USB and Bluetooth communications plus a built-in non-thermal printer.
- Suitability for boiler, engine, furnace and other combustion applications.
- A rugged design.
