

Interactive Online Training Courses

ExperTune Inc., the leading supplier of control-improvement software, now delivers online training for a wide variety of topics related to the control of proportional-integral-derivative (PID) loops. The interactive training is provided by a live instructor, and includes hands-on practice using ExperTune's "Virtual Classroom." According to the company, in addition to custom offerings, controls technicians and engineers can benefit from courses including:

- Loop Tuning — Basic PID Theory and Practice.
- Dealing with Valve Problems — Hysteresis and Stiction.
- Advanced Loop Tuning — Cascade Control.
- Many Other classes specific to ExperTune's PlantTriage software.
