

Field Balancing in One or Two Planes

LUDECA Inc.'s VIBXPert II

Balancer is the latest addition to the PRUEFTECHNIK family of portable measurement devices. According to the company, the device is characterized by:

- It is rugged, yet lightweight and is ideal for field balancing of rotating machinery in one plane or two planes.
- Its intuitive and easy-to-use graphical interface, which leads the user through the balancing procedure step-by-step, makes balancing easy.
- A large and bright color display facilitates the presentation and interpretation of the balancing data.
- A variety of balancing methods can be selected to help the user balance equipment — even in the most difficult situations.
- Built-in ISO tolerances alert the user when the equipment is within specification.
- It features vibration analysis capabilities to support the diagnosis of unbalance and other types of equipment defects.
