

Performance Optimized for Oil Sands

Chemineer® agitators provide long, trouble-free service in harsh, demanding conditions, such as those found in oil sands suspension applications. The company additionally believes that these rugged agitators grant:

- Advanced impeller technology that enhances mixing performance.
- Proprietary analysis software to evaluate process parameters and ensure proper impeller selection.
- An efficient XE-3 impeller that provides axial flow to suspend sand for oil extraction.
- An HT gearbox to withstand harsh environments for reliable operation and long service.
- The maintenance of process uptime and performance.
- A variety of sealing and lubrication features to improve personnel safety and lower maintenance costs.
- Reliable performance with proven agitator installations in oil sand suspension applications.
- The availability of retrofit packages for underperforming agitators.
