

Reference Substance for Verifying Performance

Mettler-Toledo International Inc. has launched SmartCal reference substance, designed to verify and document moisture analyzer performance with a simple 10-minute test. According to the company, SmartCal:

- Is based on a certified and traceable reference substance, which verifies instrument performance with a simple 10-minute moisture measurement.
- Fulfills the quality management system requirements of the food sector (BRC, IFS) and the pharmaceutical industry, and also meets ISO 9001.
- Offers single-use sachets, which each contain 8.5 grams of the reference substance that has a defined moisture content — the user simply places the contents of the sachet in the moisture analyzer and presses start.
- Features a straightforward Pass/Fail notification that confirms if the result is within the specified SmartCal control limits, and the instrument is ready for use.
