

Small Controllers with Expandable Memory

Phoenix Contact Inc.'s new ILC 1x1 compact controllers make advanced control options available for small- to medium-sized systems. According to the company, the series offers:

- Controllers support Modbus TCP protocol and feature an SD card slot.
- Users can configure and commission in just two steps, with no additional programming required.
- They are part of the company's "Easy Automation" system, which combines the IEC 61131-based PC Worx software, the ILC 1x1 series programmable controllers and the WP series WEBPANEL HMI operator panels.
